

TECHNICAL SERVICES

DESIGN

Repaircraft provides design services covering feasibility study, design and development, prototype manufacture, verification and validation testing.

POST DESIGN SERVICES

For mature equipment Repaircraft can take over complete technical responsibility, including Design Authority, for an equipment or system.

OBSOLESCENCE SURVEILLANCE SERVICES

Repaircraft provides fully computerised Obsolescence Surveillance Services to locate, track and monitor component availability.

RE-ENGINEERING SERVICES

If it is not possible to obtain a vital component or equipment Repaircraft can either design and manufacture a replacement, or redesign the parent equipment or system to accept a modern alternative.
